Kenandy

Kenandy Procure-to-Pay

With rising cost of goods and increasing global competition, managing procurement strategically is more critical than ever. Kenandy Cloud ERP automates your global procure-to-pay process, so you can focus on improving your procurement strategy. With Kenandy, your procurement process runs smoothly from agreement to payment—alerting you only when a problem needs your attention. Since Kenandy is on the cloud, everyone—from your suppliers to your contract manufacturers—can easily work together to make sure you get the right goods and services at the best cost. Easy to use. Automated. Real-time visibility. Better control.

Kenandy

Complete Procure-to-Pay Automation

With Kenandy Procure-to-Pay on the cloud, it's easier to manage across your distributed, global supply chain. Generate purchase orders for direct or indirect procurement, either from your MRP process or manually. At any step in the process, connect with suppliers through Salesforce Chatter or manually. Kenandy performs two/three way matching at any level of detail you need, so you're assured that what you pay for is what you ordered. When exceptions arise, the system alerts the appropriate people, so they can address problems. Resolve issues quickly and capture conversations through integrated social collaboration between employees and suppliers, in the context of the transaction. No more lost emails.

Easy to Use

For procurement, purchasing agreements make it easy to purchase goods from vendors at agreed prices and with conditions, such as quantity. If prices change, your open purchase orders are updated to reflect the new price. With an approved supplier list, you facilitate a more global approach to contract negotiation and eliminate redundant sourcing efforts within departments, and across organizations. A flexible, configurable workflow lets you add approvals or other steps anywhere in the process, to meet your enterprise-specific needs.

Real-Time, Secure Visibility

Kenandy Procure-to-Pay is your light into the black hole of corporate spending. Get reports by product, department, supplier, or requestor. Set up dashboards for visibility into the information you need on a regular basis. Gain insight into your total corporate demand and spend for better bargaining power. Kenandy manages your important data in the cloud, so now you have real-time, secure visibility anytime, anywhere, and on any device. Give appropriate access to your suppliers, contract manufacturers, engineers, sales people, and other employees, so everyone is on the same page.

Quick Time-to-Value

Want to make procurement easier without waiting for an upgrade? With Kenandy, you get going quickly, because there's no hardware or software to install. Just add users and start today. Kenandy Procure-to-Pay is part of Kenandy Cloud ERP, so you can choose features from the full ERP suite or connect back to your core ERP at any point in the process. Built on the Salesforce1 Platform, Kenandy Procure-to-Pay delivers integrated social, mobile and global functionality, providing true collaboration on any device.

Key Benefits

- Reduce administrative tasks with complete procure-to-pay automation

- Touchless direct procurement initiates from your planning process

- Make better purchasing decisions with real-time visibility

- Resolve issues quickly and capture a record of communications with social collaboration

- Quick time-to-value with a 100% cloud-based solution

- Integrated across the enterprise with Kenandy Cloud ERP or with integration to your legacy ERP

"Companies with cloud ERP systems are 65% more likely than companies without cloud ERP systems to have real-time visibility into the status of all processes."
